METROLL INTERLOCKING CLADDING

Installation

Installation of Interlocking Cladding is simple and quick with one panel interlocking into the next and fixed with a concealed fastener.

Fixing

Top Hat Installation Requirements: Galvanised Top Hats 1.15 x 35mm spaced at maximum 600mm centres and fixed at maximum 500mm centres perpendicular to direction of panel. Breathable, waterproof membrane required. Fix Interlocking Cladding panel to Top Hat at maximum 500mm centres and maximum 100mm from end of panel.

Oil Canning is the looseness which can develop in the flat pan of cold formed metal products and which can affect the aesthetic of the finished installation. It is not a structural defect. Oil Canning is caused by many factors, various measures applied during product installation can mitigate the risks. Oil Canning can occur with any colour finish, but is generally more evident with darker colours. Metroll recommend designers take this into consideration.
